

Discover the Charm of Tohoku in this Koriyama Cultural Tour Fukushima Medical Device Development Support Centre

【What's in the Plan】

■ Tour the first facility in Japan to provide integrated support for everything from the development to commercialization of medical devices. By providing opportunities to experience cutting-edge technologies such as simulated surgery and acoustic testing rooms, they offer programs that are not limited to specialized content, and that can be enjoyed by people of all ages.

■ During the facility tour, you will learn about medical technology in the Mock Operating Room and Angiography Hybrid Operating Room, and you will also be able to see designs that require advanced technology in the Waterproof Testing Room and Acoustic Testing Room.
