

Discover the Charm of Tohoku in this Koriyama Cultural Tour

Sansoken Fukushima Renewable Energy Research Center (FREA) Tour

【What' s in the Plan】

- FREA was established to develop renewable energy and revitalize the region following the Great Tohoku Disaster and Fukushima Nuclear Power Plant Disaster. Along with touring the facility, you can observe cutting-edge technology like hydrogen-powered cars up close.
- You can learn about and experience renewable energy sources of the future at FREA, such as geothermal energy, earth thermal energy, solar power, wind power, and hydrogen power.
